

Attendance App: Admin Guide

For supervisors and managers

Links

What	Link	Who
First-time setup: creates the first admin. Works once only .	YOUR-LINK/setup	Owner
Sign in (same page for everyone)	YOUR-LINK/login	Everyone
Worker: clock in / out	YOUR-LINK	Workers
Worker: my hours	YOUR-LINK/me	Workers
Admin dashboard (today)	YOUR-LINK/admin	Admins
Approvals (all pending)	YOUR-LINK/admin/pending	Admins
People: add accounts, reset PINs	YOUR-LINK/admin/people	Admins
Monthly export (CSV)	YOUR-LINK/admin/export	Admins
Settings and work sites	YOUR-LINK/admin/settings	Admins

Accounts: workers cannot sign up themselves. An admin creates every account, for workers and other admins, under **People**.

One-time setup

1. Open **YOUR-LINK/setup** and create your admin account (username + password of 8 or more characters).
2. **Settings** → **Work sites**: stand at the venue, tap **Use my current location**, then **Add site**. A radius of 150 m works well.
3. **People**: add each worker with name, **phone number** (their sign-in ID), a **PIN** (4 or more digits) and, optionally, an hourly rate. Add other admins here too (Role: Supervisor).
4. Send each worker the **Worker Guide** and their sign-in details (message template at the end).

Every day (Dashboard)

- The cards at the top show **Working now**, **Clocked out**, **Not clocked in** and **To approve**.
- Tick the shifts under **Check-ins today**, then tap **Approve selected**. Ideally do this the same day.
- Shifts with a yellow flag: tap **View** first to see the location (with a map link) and the phone used.
- **Wrong time / forgot to clock out**: View → enter the correct times → **Save**. Every change is kept in the shift history.
- **Someone couldn't clock in**: under **Not clocked in**, tap **+ add shift**.
- **Reject a shift**: View → type a reason → **Reject**. The worker sees the reason.

What the flags mean

Flag	Meaning / what to do
Checked in outside area · No GPS	Not at the venue, or GPS was off. Check the map, then ask the worker.
Not their registered phone	They used a different phone. If they changed phone, register the new one (see Phones).
Device also used by another worker	Two workers used the same phone. Possibly someone clocking in for a friend.
Many different phones lately (red banner)	Strong warning sign. Check with the worker.
Never clocked out	Enter the real finish time before approving.

Phones

A worker's first phone is registered automatically. If they genuinely change phone: **People** → **their name** → **Phones** → **Register** the new one, and **Unregister** the old one.

Month end (Export)

- Approve everything still pending first. **Only approved hours count as payable.**
- **Summary CSV:** one row per worker with total hours and pay, plus hours for every day of the month.
- **Detailed CSV:** every shift with actual and rounded times, who approved it and when.
- Hours are rounded to the **nearest 15 minutes** (e.g. 1:13 → 1:15, 3:24 → 3:30).

People admin

- **Reset a PIN:** People → name → type a new PIN → Save.
- **Someone leaves:** People → name → untick **Active** → Save. Their history is kept.

Message template for workers

Hi [name], here's our attendance app: **YOUR-LINK**
Sign in with your phone number [number] and PIN [PIN].
Please use your own phone, allow location, and tap Clock IN / Clock OUT at the venue each shift.
